EQUINOX PAYMENTS

Complete Mobility + Superior Security

The M4230 from Equinox Payments is a next-generation payment system designed to make wireless easy and affordable by offering merchants the freedom of complete mobility and the peace of mind that comes with Equinox Secure Architecture™, our proprietary security architecture that meets the most stringent industry standards for wireless security. In addition, the M4230 includes 24MB of total memory, a powerful ARM9 processor for fast transactions and the ability to support multiple applications.

This ergonomic and compact payment system comes standard with integrated PCI PTS-approved PIN entry capability and a removable, extra long-life rechargeable battery. The battery can be recharged by connecting the charger directly into the terminal or through an optional dock that also provides the convenience of an integrated V.34 modem for fast, reliable dial back-up.

Competitive advantages

The M4230 payment terminal offers a number of innovative features to help "future proof" your investment:
