

# LabelShop<sup>®</sup> 8

Label Design and  
Printing Software

- Design and print labels, tickets and tags in-house
- Three versions to fit any size of business
- Compatible with all Intermec EasyCoder printers
- Outstanding multilingual support in 18 languages
- ODBC/OLE database support
- Supports Microsoft Windows<sup>®</sup> 2000, 2003 Server, XP and Vista

LabelShop is the ideal bar code label software to meet your needs. The user-friendly interface combines powerful Windows based commands with the graphic flexibility to scale, rotate and mirror graphics.

LabelShop guides you through designing and printing labels in-house quickly and easily. Users can display multiple labels, drag and drop or cut and paste objects between labels. Objects can also be linked to other applications using OLE objects like Clip Art and spread sheet data. LabelShop uses Intermec printers for maximum speed and high quality labels with bar codes, text and graphics.

Intermec's family of LabelShop software offers a suite of choices whether the customer is a small business or a large company running their printers via the network. LabelShop can be used for label design in any application and provides excellent management tools.

### **LabelShop START**

LabelShop START provides basic label design functions, text, bar code, graphics, sequential numbering and keyboard input data, and comes free with all Intermec printers.

### **LabelShop ULTRA and PRO**

LabelShop ULTRA and PRO provide a range of additional features to perform labeling tasks for every possible situation.

LabelShop PRO is also available in Network versions for 5 or up to 50 users. Intermec's LabelShop ULTRA and PRO versions support ODBC for accessing existing corporate databases. This is valuable to ensure up to the minute information is printed on all bar code labels. This eliminates extra steps in the label design process as well as possibility of errors or outdated pricing or part numbers.

Using the Code Converter feature in ULTRA and PRO versions enables users to import existing label formats and printer command language files. This eliminates the dependency of label design to the printer command language. Once imported, the data stream is converted to print on the printer of choice.

LabelShop PRO is not only a label printing software, but a powerful tool in label printing solutions. Develop command files for use in host systems, or store them in the printer for simple printing from host.

## About us

- Legacy Technology Services is a leading nationwide provider of mobile computing, barcode, printers and point of sale equipment and services.
- For over a decade, thousands of clients across North America have trusted us to provide equipment from leading manufacturers backed by the services to support them.

## Latest Hardware from top manufacturers

- Legacy handles virtually every major manufacturer of mobile computing, barcoding and point of sale equipment.

## Expert Repair and Maintenance services

- Legacy is one of the best repair facilities in North America

## Discontinued product sourcing

- They don't make it anymore? Our inventory also includes manufacturer close-outs and discontinued equipment to support our clients legacy infrastructure.

## Trade-in and Disposal services

- That old equipment laying around your facility may still have some value. Legacy routinely purchases equipment from our clients around the globe.
  - Data destruction
  - Hardware disposal
  - Auditing services

## Dedicated client account team

- Dedicated, highly trained account managers are here to answer all your questions and provide top notch service.

## Equipment rental services

- Sometimes renting is a better solution, Legacy's huge rental inventory provides the equipment you need for temporary needs and projects.
