WORKABOUT PRO

The Flexible, Expandable Workhorse

Something's very wrong if you have to throw out your fleet of handheld computers just because your needs change.

At Psion Teklogix, we take a different approach. The WORKABOUT PRO has hardware expansion slots that make adding new modules fast and easy – there's a whole range of add-ons already available – everything from fingerprint scanners to the largest selection of RFID readers on any handheld device. Period.

It just might be the most flexible, intelligent, rugged handheld computer ever made...

WORKABOUT PRO

The Flexible, Expandable Rugged Handheld Computer

THE MOBILE WORKHORSE

Let's face it: you have no idea what tomorrow will bring. The rugged handheld computer you choose today may not be right when your needs change.

Unless you choose the legendary WORKABOUT PRO. It's built on the Modulus™ platform, so it's easily extended using a wide range of hardware modules – anything from passport readers and fingerprint scanners to WAN radios, laser scanners, imagers and Bluetooth® printers. Plus a growing range of connectivity peripherals (RS232, USB...) that mean you'll never regret your decision.

Our many partners are always developing new modules. Choose one to meet your unique needs, change one when your needs evolve or use the Hardware Development Kit to make your own.

FEATURES & BENEFITS

The mobile workhorse
The WORKABOUT PRO is relied on every day in mobile-intensive applications such as asset tracking, meter reading, and mobile ticketing across a variety of industries such as field service, courier, retail, warehousing and manufacturing – and the list continues to grow.

It's more than a data capture device. It's a cellphone and an intelligent workstation too, allowing your mobile workers to call customers, upload route maps, and send data back to office headquarters.

It's all about choice
Choose WiFi, GPRS/EDGE or 3G HSDPA voice and data. Choose numeric or full alphanumeric keyboards. Choose your scanners, imagers and RFID options. There's even a choice of Windows® operating systems.

Even once deployed, you've still got options, with a universe of hardware modules and software applications to choose from.

The mobile worker is our focus
WORKABOUT PRO's Natural Task Support™ means mobile workers get the job done faster and more comfortably, even over the longest shifts.

It starts with a full VGA display for finer details in maps and schematics, and easier readability even in low light and direct sunlight. The ergonomic keypad is designed for one-hand operation with clear, unambiguous feedback. But it also comes down to intangible things like the feel in your hand, the balance and the way your fingers seem to fall in just the right way.

Rugged beyond the ratings
The WORKABOUT PRO is tested to withstand drops from six feet to concrete and easily handles the kind of shock and vibration you get from mounting it on a truck or a forklift. It has an IP65 rating, protecting it against dust and water sprayed from all directions.

Accessories

Quad Docking Station c/w UPS
The Quad Docking Station allows up to four WORKABOUT PRO units to charge simultaneously while providing 10/100 BaseT Ethernet communications. It also provides sufficient power to fast-charge the batteries in the unit.

Desktop Docking Station
The Desktop Docking Stating supports all variants of the WORKABOUT PRO. It simultaneously provides USB Host and Client functions. Ethernet or RS232 are supported via expansion adapters. An additional battery charger well is integrated to ensure that your spare batteries remain fully charged.

Asset Tracking

Quad Battery Charger
The Quad Battery Charger can charge either Standard or High Capacity batteries simultaneously.

"Psion Teklogix was able to demonstrate such a compelling return on investment, that there was no reason not to proceed with adoption of the system immediately." – Wilkinson

Pistol Grip - Multiple options available
The WORKABOUT PRO pistol grip attachment allows easy conversion to a pistol grip unit. Various pistol grips are available to accommodate a wide range of applications and model variants.

End Cap - Multiple options available
Shown is a 1D Imager End-Cap. The 1D Imager is a low power, compact, and ergonomic scanning solution that features an extremely high read rate. It automatically and instantly adapts to varying light conditions and provides users a bright targeting line that is readable even in bright sunlight.
Postal / Courier

Powered Vehicle Cradle 12V
A highly ruggedized, single unit station dock/charger, powered by DC power sources over a 9V to 20V range. This cradle provides quick insertion and removal while holding the WORKABOUT PRO securely – even when operated in high vibration environments. Non-powered options also available.
